Three-Digit Numbers Bar Modelling

I can partition numbers into hundreds, tens and ones.

Circle the missing value in the bar models. One has been completed for you.

1.			137		
	100			?	1 1 1 1 1 1 1
	37	10	30	100	

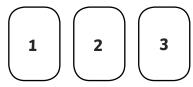

2.	187						
	100			80		?	
	87	100	7	8			

3.	153							
	100			?	3			
	53	50	103	150				

4.	271						
	?			70	1		
	270	100	170	200			

5.	254							
		200			?	4		
		10	50	204	54			

6. Here are some digit cards.

Arrange the digits in different ways to create 6 different numbers. Represent the numbers using bar modelling. Cut and stick the correct bars to this sheet and label each bar to show the number that they represent.
